

FACTSHEET ON SINGTEL'S PARTNERSHIPS AND DIGITAL OPPORTUNITIES IN CHONGQING

Singtel has signed a Memorandum of Understanding (MOU) with the three leading communications service providers in China – China Mobile, China Unicom and China Telecom – at the Smart China Expo in Chongqing to improve data connectivity between Chongqing and Singapore. This collaboration is intended to position the two cities as strategic hubs for enterprises to expand into western China and the Asia Pacific region respectively.

Under the MOU, Singtel will partner the three Chinese communications service providers to link seven industrial parks in Chongqing with secure, high-speed connectivity, using Singtel's ConnectPlus high-speed network.

“Our collaboration with China Mobile, China Unicom and China Telecom will strengthen communication links and boost economic and technological ties between Chongqing, Singapore and the region,” said Mr Goh Boon Huat, Vice President, Business Products, Group Enterprise at Singtel. “The enhanced data connectivity will also empower businesses in Singapore and Chongqing, enabling the adoption of digital technologies in the areas of cloud, IoT and smart cities.”

DIGITAL FOCUS AREAS

i. Cloud

Enterprises can seize digitalisation opportunities by adopting cloud solutions using secure public and private cloud platforms and applications. Singtel provides consultancy, cloud migration, security and governance services to help enterprises move seamlessly to the cloud.

ii. IoT

Enterprises in Chongqing and Singapore, particularly manufacturers, can seamlessly deploy IoT devices such as those installed in cars, consumer electronics, and industrial equipment across both countries, without having to manually configure the devices or switch networks. This is enabled by a Master Services Agreement signed in February 2019 between Singtel and China Mobile International Limited.

iii. Smart city solutions

Singtel, through its subsidiary NCS, offers an integrated info-communications and technology platform that can accelerate transformation and facilitate data exchange in the areas of logistics, ecommerce, transportation and government services.

About Singtel

Singtel is Asia's leading communications technology group, providing a portfolio of services from next-generation communication, technology services to infotainment to both consumers and businesses. For consumers, Singtel delivers a complete and integrated suite of services, including mobile, broadband and TV. For businesses, Singtel offers a complementary array of workforce mobility solutions, data hosting, cloud, network infrastructure, analytics and cyber-security capabilities. The Group has presence in Asia, Australia and Africa and reaches over 690 million mobile customers in 21 countries. Its infrastructure and technology services for businesses span 21 countries, with more than 428 direct points of presence in 362 cities.
