## Statistics on Capacity/Bandwidth services

[Scroll to view >](#)

CATEGORY <sup>1</sup>	Jun 2019	Dec 2019	Jun 2020	Dec 2020	Jun 2021
<b>International Internet Capacity<sup>2</sup></b>					
Total International Internet Capacity (in Mbps)	18,518,900	21,711,300	16,748,000	28,525,300	36,227,000
<b>International transmission capacity owned<sup>3</sup></b>					
Total international transmission capacity owned (in Mbps)	80,923,200	108,072,100	92,423,800	142,207,700	169,560,000
- Submarine Cable (in Mbps)	80,807,400	107,956,100	92,011,800	142,093,700	169,450,000
- Others (in Mbps)	115,800	116,000	411,900	114,000	113,400

All figures are rounded to the nearest hundred.

These telecom statistics are subject to revision from time to time to ensure accuracy.

<sup>1</sup>With effect from Jun 2009, statistics on Capacity/Bandwidth services will be updated on a half-yearly basis every June and December.

<sup>2</sup>International Internet Capacity refers to the total activated bandwidth/capacity owned by operators licensed in Singapore to carry Internet traffic. This figure excludes bandwidth/capacity owned by overseas operators transiting traffic through Singapore.

<sup>3</sup>International transmission capacity refers to the total activated bandwidth/capacity owned by operators licensed in Singapore to provide all forms of international bandwidth/capacity services, including IPLC, international managed data network services, Internet connectivity etc. This

figure excludes international transmission capacity owned by overseas operators transiting traffic through Singapore.
