# PreSAGE

Better Prediction Better Care

PreSAGE is a predictive patient monitoring platform that emphasizes on three key design principles
• Non-contact
• Non-intrusive
• Continuous surveillance.

A system that offers AI-driven solutioning; privacy-ensured recording for post analysis; round-the-clock patient safety and overall service quality improvement. Suitable for nursing homes and hospitals.

www.presage.health

Round-the-clock patient safety

- No distinguishable facial features.
- Preserves patient's privacy - one important feature in a healthcare institution.

PreSAGE is mounted on ceilings, providing continuous, non-intrusive monitoring of patients and their environment.

A visual and audio alarm is triggered when a bedexit is predicted.

The care team responds early, and provides the necessary intervention.
