

SaaS & Device Management that simplifies how IT works

360° Control of SaaS Apps & Devices

Centralized Visibility

Connects employee data with their assigned SaaS license and devices for centralized control of IT assets.

Cost & License Optimization

Surfaces licenses leakage, identifies underutilized and redundant apps, and manages devices refresh cycles.

Automated Provisioning

Implements workflow automation to reduce IT tasks and expedite employee on/offboarding.

Shadow IT Discovery

Improves security posture and IT governance with secure access controls and app utilization insights.
