#### **Cloud Service Provider Background**

#### Overview of service offering:

Office 365 (O365) is a multi-tenant cloud computing-based subscription service offering from Microsoft. Cloud computing has been defined by NIST as a model for enabling convenient, on-demand network access to a shared pool of configurable computing resources (e.g., networks, servers, storage, applications, and services) that can be rapidly provisioned and released with minimal management effort or cloud provider interaction. Further, as defined within NIST SP 800-145 (The NIST Definition of Cloud Computing), the service model for O365 MT is Software-as-a-Service (SaaS). SaaS is a model of software deployment whereby one or more applications and the computational resources to run them are provided for use on demand as a turnkey service. Its main purpose is to reduce the total cost of hardware and software development, maintenance, and operations. Security provisions are carried out mainly

-	by the cloud provider. The cloud subscriber does not manage or control the underlying cloud infrastructure or individual applications, except for preference selections and limited administrative application settings.						
Onlin creat	D365 provides customers with cloud versions of Exchange Online (EXO), SharePoint Online (SPO) (including Project Online), and Skype for Business (Skype). Exchange Online is an email service. SharePoint Online is a solution for creating sites to share documents and information. Skype is a communication service that offers instant messaging, audio and video calling, online meetings, and web conferencing capabilities.						
		n scope are: Exchange Online, SharePoint Online, and Skype focom/en-us/business/explore-office-365-for-business for Office 365's					
Servi	ce model:

Data	Control		
3.	Data ownership	All data on the cloud service is owned by the cloud user except for: content the customer did not upload into or create within the service.	The following lists several frequently asked questions with

Smakherjee

		The cloud User retains the ownership on the derived data or attributes of cloud usage except for the following:  Advertising or marketing  Statistics analysis on usage  Others	regards to data ownership:  http://office.microsoft.com/en-us/business/office-365-online-data-portability-FX103045783.aspx
4.	Data retention	Data deleted by the user is retained as follows:  ☐ Minimum data retention period is: 90 Days ☐ Maximum data retention period is: ☐ Deleted immediately  Log data is retained for a period of: ☐ Minimum data retention period as follows: ☐ Maximum data retention period is: 90 days ☐ Not retained  User data is retained for a period of: ☐ Minimum data retention period is: ☐ Maximum data retention period is: Default is 90 days after closure of storage account ☐ Not retained  The following types of data are available for download by the cloud user: ☐ Log data ☐ Other Log Data from VMs as well as diagnostic data from Azure Diagnostic API	Customers may extract and/or delete Customer Data at any time. When a Subscription expires or terminates, we will retain any Customer Data you have not deleted for at least 90 days so that you may extract it, except for free trials, where we may delete Customer Data immediately without any retention period.  Customers remain responsible for all storage and other applicable charges during this retention period.  Following the expiration of this retention period, we will delete all Customer Data, including any cached or back-up copies, within 30 days of the end of the retention period  For Office 365, upon request, Tenant Admin can download technical documentation on deleting Tenant and User data.  These guides can be requested via customer support service.  On log data retention, this varies by type of log. Logs controlled by the user are retained

			for whatever period the user sets. Most, but not all, platform logs are retained 90 days.  Users can download logs maintained within their own virtual
5.	Data sovereignty	The primary data locations are:  □ Singapore □ Asia Pacific □ Europe □ United States  The backup data locations are: □ Singapore	machines.  Customers can choose their data locations and their data will stay within that location they specify (Singapore and Hong Kong), this includes service logs that contain customerauthored data.  Please find the details of Office 365 data centre locations here:
		<ul> <li>☑ Asia Pacific (Hong Kong)</li> <li>☐ Europe</li> <li>☐ United States</li> <li>No. of countries in which data centres are operated: 8</li> <li>The user's data stored in the cloud environment will never leave the locations specified in item 5:</li> <li>☐ Yes</li> <li>☑ Yes, except as required by law</li> <li>☑ Yes, except as noted: See <u>Trust Center</u> link for details</li> </ul>	http://www.microsoft.co m/online/legal/v2/?docid =25
		No User's consent is required prior to transferring data to a location not specified in item 5 or a third party:  Yes Yes, except as required by law  Yes, except as noted:  Yes, except as noted:	Office 365 Trust Centre link: https://products.office.com/en- us/business/office-365- trust-center-cloud- computing-security

		□	
		No Consent is obtained via service agreement and in privacy statement.	
		Note: Cloud users are responsible for determining the impact of data protection and data sovereignty laws on the locations where data is stored. In addition, users should understand the risks associated with relevant laws that may allow for law enforcement or other government access to data in-transit or storage with Cloud Service Providers.	
6.	Non-disclosure	Non-disclosure agreement template can be provided by Cloud Service Provider  ☐ Cloud Service Provider may use customer's NDA (pending legal review)	Non-disclosure is addressed in the service agreement, which includes the following commitment:  Microsoft will not disclose Customer Data to a third party (including law enforcement, other government entity, or civil litigant; excluding our subcontractors) except as Customer directs or unless required by law. Should a third party contact Microsoft with a demand for Customer Data, Microsoft will attempt to redirect the third party to request that data directly from Customer.  As part of that, Microsoft may provide Customer's basic contact information to the third party. If compelled to disclose Customer Data to a third party, Microsoft will promptly notify Customer and provide a copy of the demand, unless legally prohibited from doing so.
Provi	der Performance		
7.	Availability	The committed network uptime is:  ☐ 99.9 to 99.95%	Minimum SLA for all Office 365 services in scope is 99.9%.
		□ Varies according to price plan	Please find the details and conditions of SLAs

		The committed system uptime is:	for Office 365 services: <a href="http://office.microsoft.c">http://office.microsoft.c</a>
		99.9 to 99.95%	om/en- us/business/office-365-
		□ Varies according to price plan	trust-center-cloud- computing-security-
		The cloud environment has the following single points of failure:	FX103030390.aspx#op erations
		⊠ None	No single point of failure since the underlying infrastructure is distributed.
8.	BCP / DR	☑ Disaster recovery protection	Microsoft does not
		☐ Backup and restore service	provide escrow arrangements, but will
		☐ User selectable backup plans	provide process for SLA service credit claims.
		☐ Escrow arrangements	
		☐ No BCP / DR is available	
		⊠ RPO Managed by cloud user	
		⊠ RTO Managed by cloud user	
		Others, please specify:	
9.	Liability	The following terms are available for the users on failure of the provider to meet the service commitment:	Liability for outages is addressed in the
		Network failure     ■     Network failure     Network failure	Service Level Agreements, available
		Liability:	here: http://technet.microsoft.
		☐ Infrastructure failure	com/en-us/library/office- 365-service-level-
		Liability: <u>Same as network failure</u>	agreement.aspx
		Liability: Same as network failure	
		☐ Migrations	
		Liability:	
		□ Unscheduled downtime

		□ Database failure	

		Liability: Same as network failure	
		Monitoring failure	
		Liability: <u>Same as network failure</u>	
Servi	ce Support		
10.	Change management	The Cloud Service Provider has established the following for changes, migrations, downtime, and other potential interruptions to cloud services:  ☐ Communication plan and procedures for proactive notification ☐ Assistance in migration to new services when legacy solutions are discontinued	Assistance in migration to new services when legacy solutions are discontinued - SaaS: Will provide guidance for migration
		Ability to remain on old versions for a defined time period	scenarios.
		Ability to choose timing of impact	
11.	Self-service provisioning and	Provide self-service provisioning and management portal for users to manage cloud services:	RBAC is implemented on Office 365.
	management	⊠ Yes	
	portal	□No	
		If yes, describe the functions of the self-service provisioning and management portal provided:	
		☐ Track and manage the lifecycle of each service	
		☐ Track consumption of services	
		☐ Others:	
12.	Incident and	Delivery mode of support:	Please find the different
	problem management		support plans as follows:
		□ Access via portal	http://technet.microsoft.
		□ Access via phone support	com/en-us/library/office- 365-support.aspx
		□ Direct access to support engineers	
		Availability of support:	

		<ul> <li>         ∑ 24 x 7         </li> <li>         ∑ During office hours support, please specify the hours of operations: Dependent on local business hours         </li> <li>         ∑ After office hours support, please specify the hours of operations: 24x7 support in English         </li> <li>         Service response time: Dependent on severity of incident and type of support plan; between 15 minutes – 8 hours         </li> <li>         The following are available to users upon request:         <ul> <li>□ Permanent access to audit records of customer instances</li> <li>□ Incident management assistance</li> </ul> </li> <li>         Incident response time: Dependent on severity of incident and type</li> </ul>	Customers have continuous access to their own virtual machines and other services. Auditing of workloads, vulnerability assessment and penetration testing within the Virtual Machines or for their own virtual machines is the customer's responsibility.
		of support plan; between 15 minutes – 8 hours  Mean time to repair on detection of faults:	
13.	Billing	The following billing modes are available (please elaborate granularity of charges and measurement):    Pay per usage per hour (up to per user per hour/day/month/year for SaaS)   Fixed pricing (up to yearly/monthly/daily)   Other pricing model Enterprise Agreement for Azure   Not disclosed   Available billing history: Months	Other pricing model: Office 365 has a monthly committed spend model which offers discounts to corporations based on the number of users. Additional information can be found:  http://products.office.co m/en- us/business/compare- office-365-for-business- plans  Customers are able to see the entire billing history since the subscription starts.
14.	Data portability	Importable VM formats: Not Applicable  Downloadable formats: Separate data format  Supported operating systems: See side remarks  Language versions of supported operating systems:	Customers can extract their data from Office 365 anytime, there is no VM associated. Supported OS:
		See side remarks Supported database formats: See side remarks	Windows, iOS and Android

		API:  ⊠ Common See side remarks  ⊠ Customised See side remarks	m/2 office extending wind and	://blogs.office.co 014/10/28/new- ee-365- ensibility- dows-ios- roid-web- elopers/

			Office 365 MT uses Azure AD to implement Role Based Access Control (RBAC) via the use of AD groups. For the purposes of this control, the term "security group" references an Azure AD group which is used to enforce RBAC permissions.
17.	Lifecycle	The cloud user may select the following for service upgrades and changes:	
		□ Automatic provisioning	
		☐ User customisable provisioning	
Secu	rity Configuration	ns	
18.	Security configuration enforcement checks	Security configuration enforcement checks are performed:  Manually  Using automated tools  How often are enforcement being performed to ensure all security configurations are checks applied?  External audits are done annually. Self-assessment is performed daily.	Refer to the following link for more information:  http://office.microsoft.com/en-us/business/office-365-trust-center-cloud-computing-security-FX103030390.aspx#welcome
19.	Multi-tenancy	<ul> <li>□ Distinct physical hosts</li> <li>□ Distinct physical network infrastructure</li> <li>☑ Virtual instance grouping</li> <li>□ User definable security domains</li> <li>□ User customisable firewall</li> <li>☑ User definable access policies</li> </ul>	
Servi	ce Elasticity		
20.	Capacity elasticity	The following capacity elasticity options are available:  Programmatic interface to scale up or down  Mean time to start and end new virtual instances  Alerts to be sent for unusual high usage	Minimum performance during peak periods – No.

		☐ Minimum performance during peak periods	
		☐ Minimum duration to scale up computing resources	
		☐ Minimum additional capacity guaranteed per account (number of cores and GB memory)	
21.	Network resiliency and elasticity	The following network resiliency and elasticity options are available:  Redundant Internet connectivity  Selectable bandwidth up toMbps  Maximum usable IPs You can use any IP address range defined in RFC1918. That means the entire 10.0.0.0/8 (16.777,216 addresses)  Load balancing ports  Load balancing protocols  Anti-DDOS protection systems or services  Defence-in-depth mechanisms, please specify: See side remarks  Network traffic isolation, please specify: See side remarks  Shared or dedicated bandwidth, please specify: Shared. Dedicated based on geographical availability. See side remarks.  QoS traffic control services  Alerts to be sent for unusual high usage  Minimum period to scale up network throughput	Defence-in-depth mechanisms, please specify: http://www.windowsazu re.com/en- us/support/legal/securit y-overview/  Microsoft Azure network security whitepaper: http://download.microso ft.com/download/4/3/9/4 3902EC9-410E-4875- 8800- 0788BE146A3D/Windo ws%20Azure%20Netwo rk%20Security%20Whit epaper%20-%20FINAL. docx
22.	Storage redundancy and elasticity	The following storage redundancy and elasticity options are available:  ☐ Redundant storage connectivity links within each data centre	Office 365 Storage includes a "service" called Geo-Replication. It provides durability by constantly maintaining
		<ul> <li>☑ Redundant storage connectivity links between data centres belonging to the same cloud</li> <li>☐ Storage traffic isolation, please specify:</li> </ul>	multiple healthy replicas of data both within and between data centres.
		U otorage traffic isolation, please specify.	With geo-replication,

	Shared or dedicated storage network bandwidth, please specify:	Azure Storage keeps data durable in two locations. It replicates customer data hundreds of miles between two locations (i.e. between North and South US, between North and West Europe, and between East and Southeast
	☐ Quality of service storage traffic control services ☐ Maximum storage capacity for entire cloud, please specify:	
	<ul> <li>✓ Maximum storage capacity for single user, please specify:</li> <li><u>100 TB per account for storage account created before 7</u></li> </ul>	Asia) to provide disaster recovery in case of regional disasters.
	<ul> <li>June 2012</li> <li>200 TB per account for storage account created on 7 June 2012 or later</li> <li>1 TB per user for Office 365</li> </ul>	Also the geo-replication information from one data centre to another as following:
	<ul> <li>✓ Maximum expandable storage, please specify:</li> <li>Refer to above for maximum storage account</li> <li>✓ Alerts to be sent for unusual high usage</li> </ul>	http://blogs.msdn.com/b /windowsazurestorage/ archive/2011/09/15/intro ducing-geo-replication- for-windows-azure-
	☐ Minimum storage I / O performance during peak periods ☐ Minimum period to scale up storage I / O throughput	Billing alert enables customer to get proactive email notifications when the bill goes above a
		certain monetary threshold that customer configures.
