6. Annex A

1

CITREP⁺ Objectives

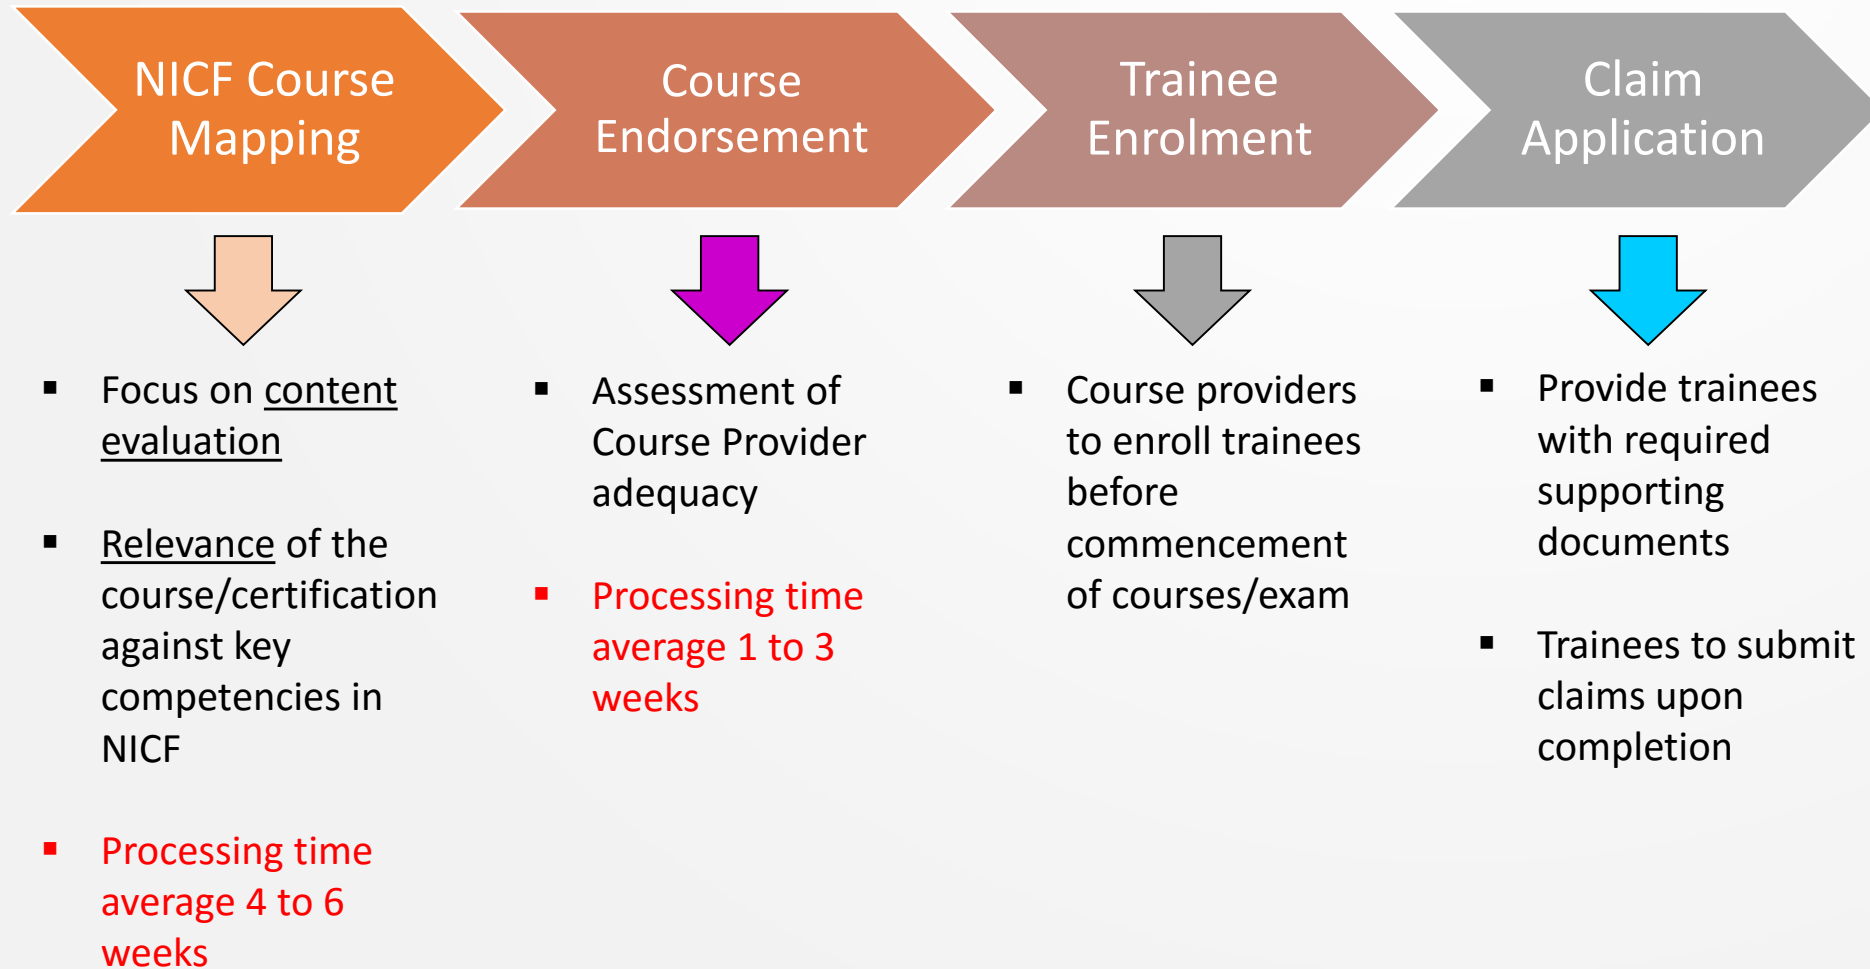

CITREP⁺ Objectives

- To build a strong core of specialised Singaporean ICT professionals with Smart Nation capabilities
- To develop and offer quality infocomm professional development technology courses and professional certifications that impart knowledge and skills in relevant areas

2

Overview of CITREP⁺ Workflow Process

Overview of CITREP+ Workflow Process

3

CITREP⁺ Vocab

CITREP+ Vocab

Important “VOCAB”

NICF –

CAB / CO - Certificate
Awarding Body,
Certification Owner,
Curriculum Owner

Entities issuing qualifications
(certificates or titles)

CP - Course
Provider

Entities that deliver the
training courses or
examinations

ICMS –

AA - Approving Authority

AO – Administrative Officer

4

NICF Course Mapping

NICF Course Mapping

NICF Course Mapping validity

Up to 31 March 2018

NICF Course Mapping - Overview

- The National Infocomm Competency Framework (NICF)
 - National Infocomm Roadmap that **articulates the competency requirements** of key Infocomm professionals.
 - Identifies various ICT sectors and defines the functional groups, key job roles and its functions
 - 631 competency standards for 334 industry job roles

- Facilitate the course mapping process for CITREP+
 - Leverage on NICF to **determine the types of skills and competencies required** for various infocomm jobs
 - Develop training strategies for professionals to acquire these skills

Competency Standards – How they do affect Course Providers?

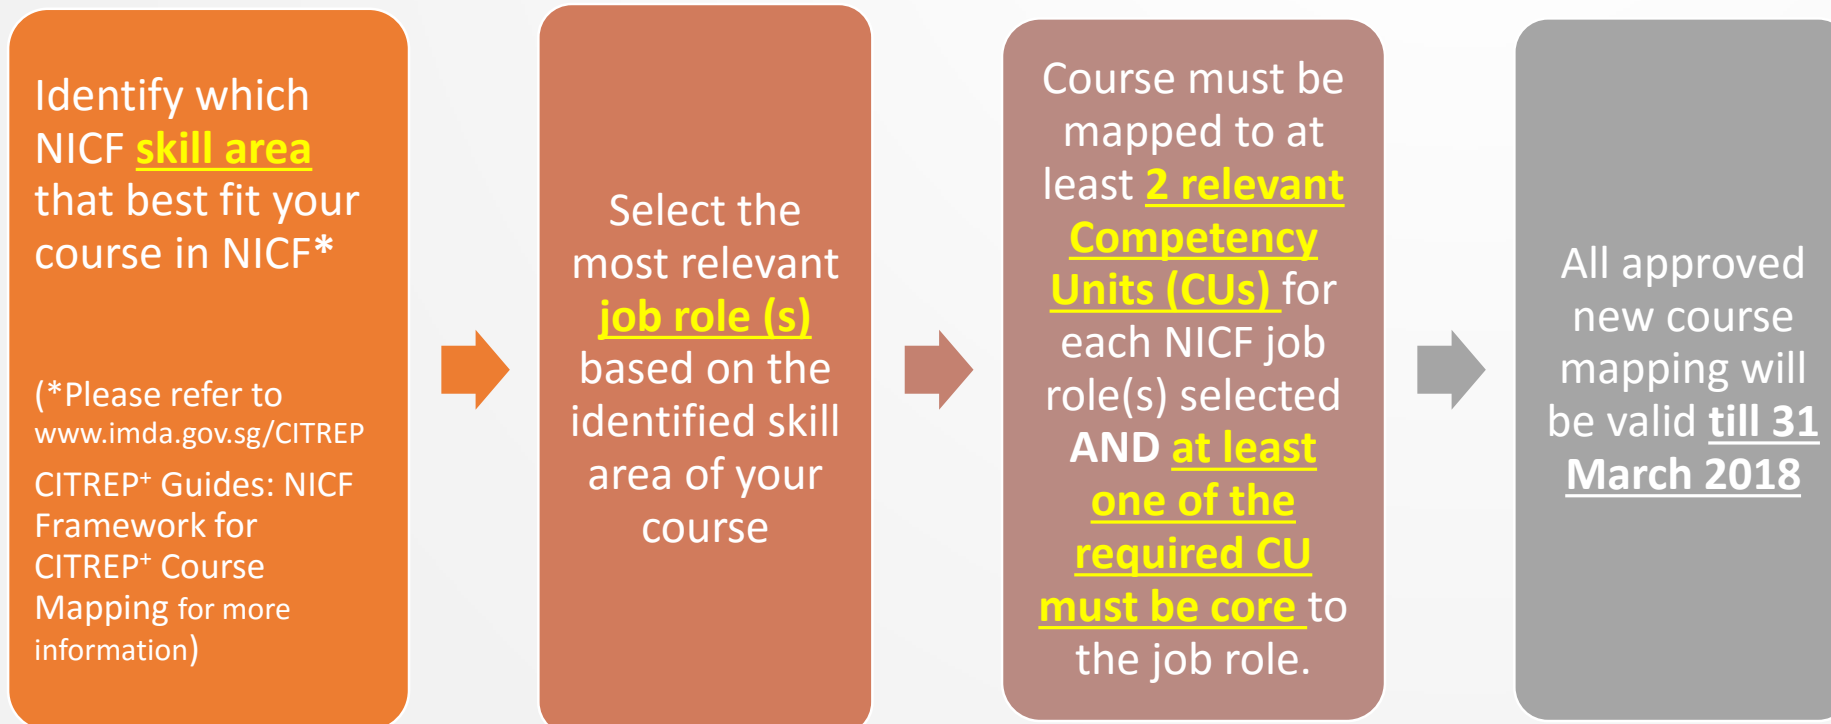

□ Endorsement and Branding

- Benchmark for Quality and Standards
- Marketing Edge – locally and regionally
- Recognised by employers

□ Alignment with NICF

- Facilitate the endorsement process for CITREP+ programme
- Courses that are endorsed as being NICF Aligned/Accredited will be featured on NICF portal

NICF Course Mapping

Supported NICF Skill Areas

- Areas eligible for **Courses and Certification** support level
(Entry Level & Above)

Business Analytics

- e.g. Big Data Analytics, Operations Research, Statistics and Mining, Text Analyst

Cloud Computing

- e.g. Cloud Architecture, Cloud Engineering, Cloud Operations, Cloud Services

Data Centre Management

- e.g. Data Centre Design and Implementation, Data Centre Operations, Maintenance and Monitoring

Database Management

Enterprise Mobility

- e.g. Enterprise Mobility Design, Enterprise Mobility Development & Deployment

Supported NICF Skill Areas

- Areas eligible for **Courses and Certification** support level
(Entry Level & Above)

Enterprise Networks Design & Management

- e.g. Network Operations Management, Network Operations Management, Monitoring and Maintenance, Network Planning and Design

Green ICT

- e.g. Data Centre Design and Implementation, Data Centre Operations, Maintenance and Monitoring, Green Advisory, Requirements Gathering & Process Redesign

ICT in Media

- e.g. Digital Advertising/Digital Media Distribution

Infocomm Security

- e.g. Security Engineering, Security Management, Security Operations, Security Services

Infrastructure Architecture

Supported NICF Skill Areas

- Areas eligible for **Courses and Certification** support level (Entry Level & Above)

Infrastructure Support

- e.g. System Support, Technical Support

Next Generation Network (NGN)

- NGN Implementation & Deployment, NGN Operations & Maintenance, NGN Planning & Design

Product Management

- e.g. Developing Product and IP Strategy & roadmap; Software product management/architecturing; Product Release Management

Software Design & Development

- e.g. Application Support, Design, Development & Deployment, Quality Assurance, Requirement Gathering and Process Redesign, Testing

Supported NICF Skill Areas

- Areas eligible for **Courses and Certification** support level
(Entry Level & Above)

Telecommunications Network Operations, Planning and Management

- e.g. Telecommunications Network Operations & Maintenance, Telecommunications Network Planning & Design, Telecommunications Radio Access Network Management, Telecommunications Wired Network Management

IT in Financial Services

- e.g. Development & Deployment, Information Management, Infrastructure Architecture, Requirement Gathering and Process Redesign

IT in Healthcare

- e.g. Health Informatics, Information Management, Information Technology – Application Support, Information Technology – Design, Information Technology – IT Management

Supported NICF Skill Areas

- Areas eligible for **Certification** support only
(Entry Level & Above)

IT Management

IT Outsourcing Management

Portfolio Management (in ICT)

Project Management (in ICT)

NICF Course Mapping - Criteria

Types of Courses and Certification

- **Certifiable Programme**
 - Courses that lead to industry-recognised certifications
 - Appointment by Certificate Awarding Body (CAB)
 - Review on the Certification:
 - Certification Governing Body
 - Body of Knowledge & its currency
 - Certification Approach/Mechanism

Total Duration for Course and Exam Completion

- Minimum - 3 days / Maximum – 12 months

NICF Course Mapping - Criteria

Supporting documents to provide

- 1) Detailed **course curriculum and course materials** (incl. training and/or certification roadmap) – **4 sets**
 - 2) Justification for course mapping - Demand for the selected job role & skill area)
 - 3) Letter of authorisation from Certificate Awarding Body (if applicable)
 - 4) Non-refundable administration fee of \$600 per course, subject to 7% GST (Inclusive of Course Mapping with Endorsement application)
-
- *Please note that NICF Course Mapping is an independent process from CITREP⁺ course endorsement application.*
 - *Courses and certifications that are accepted for mapping will be listed on NICF Portal (www.nicf.sg). The same course/certification has to meet the endorsement criteria if it is submitted for funding support. The course materials used for evaluation will not be returned to CP. The estimated processing duration is about 4-6 weeks from a complete submission.*

NICF Mapping Application

Course Mapping Application Submission

- NICF Mapping applications are submitted online via the Infocomm Competency Management System (ICMS):
 - <https://eservice.imda.gov.sg/icms>
- Please refer to the **ICMS Course Mapping and Endorsement User Guide** for the steps to submit the NICF Mapping application

NICF Course Mapping Application Fee

Payable to “IMDA” upon application

Course Mapping with Endorsement	<u>S\$600</u> per course application (subject to 7% GST) Total Payable: S\$642
Course Endorsement	<u>S\$350</u> per course application (subject to 7% GST) Total Payable: S\$374.50

Please note:

For Course Mapping with Endorsement application, there will be no refund if no course endorsement application is submitted.

 PRINT  SHARE

CITREP+ supports local ICT professionals in keeping pace with technology shifts through continuous and proactive training. Through the training, they will acquire technical skills sets that will enable them to remain relevant and productive.

CITREP Webpage

Application Procedure

All course endorsement and claim applications must be submitted online via the online system known as Infocomm Competency Management System (ICMS).

Applicants must upload and attach the supporting documents via ICMS during the submission of online applications.

The sponsoring organisations and self-sponsored individuals must have a valid ICMS account to submit a CITREP+ claim. To apply for a new organisation or individual account, please [click here](#).

All applicants must have their SingPass ID and password to access ICMS. To find out more and/or apply for SingPass, please [click here](#).

To access ICMS, please [click here](#).

To download CITREP+ guides, please [click here](#).

NICF Framework for CITREP+ Course Mapping

Job Level	Job Role	Responsibilities	Competency Category	Competency Code	Competency Unit	Performance Statements
Expert / Management	Manager - Statistics and Mining	1. Work with the Information Technology team in setting up database and data warehouse for analytics 2. Define and implement testing methods to ensure statistical models achieve desired outcomes 3. Identify and deliver relevant analytics solutions to address key business needs and drive business growth 4. Present business proposal to the senior management to address key business needs and drive business growth 5. Provide guidance to the analysts on business problems / requirements 6. Evaluate new approaches, platforms or statistical methodology to improve the robustness of the analytics team	Information Management	IT-DE-502S-1	Design extract, transform and load (ETL) process	1. Analyse and identify the business requirements, the respective source data systems and data models in the organisation 2. Design staging databases to store the data temporarily before moving them into the target system 3. Design extraction process for consolidating data from multiple data source systems 4. Verify extracted data with business rules specified in target system 5. Design the process to transform extracted data into structures and data types that align to the business rules incorporated in the target system 6. Apply data analysis and data profiling to improve the clarity, quality and integrity of valid data to achieve the business requirements and needs of the organisation 7. Manage the integration of data into a unified interface 8. Develop load process to upload transformed and integrated data to live target system 9. Monitor and maintain the ETL process based on data changes over time and target system business requirements
				IT-IM-502S-2	Analyse report and trends	1. Assist senior management in the establishment of scope, policies and procedures for reporting the organisation's trend 2. Test reports generated by tools against source data to ensure accuracy and validity 3. Analyse trends and findings from reports and identify gaps and key issues, solutions and conclusion 4. Work with the relevant parties to address gaps and key issues highlighted in the reports 5. Define action and work plans to address gaps and key issues highlighted in the reports 6. Present proposed action work plans to senior management
			Statistics and Mining	IT-STM-501S-1	Evaluate testing methods for statistical model	1. Evaluate the statistical model's objectives and data available 2. Assess and select the appropriate testing method to validate the statistical model 3. Communicate the decision to the analysts developing the statistical model

Action: Identify the relevant Job Family based on the selected skill area

NICF Framework for CITREP+ Course Mapping

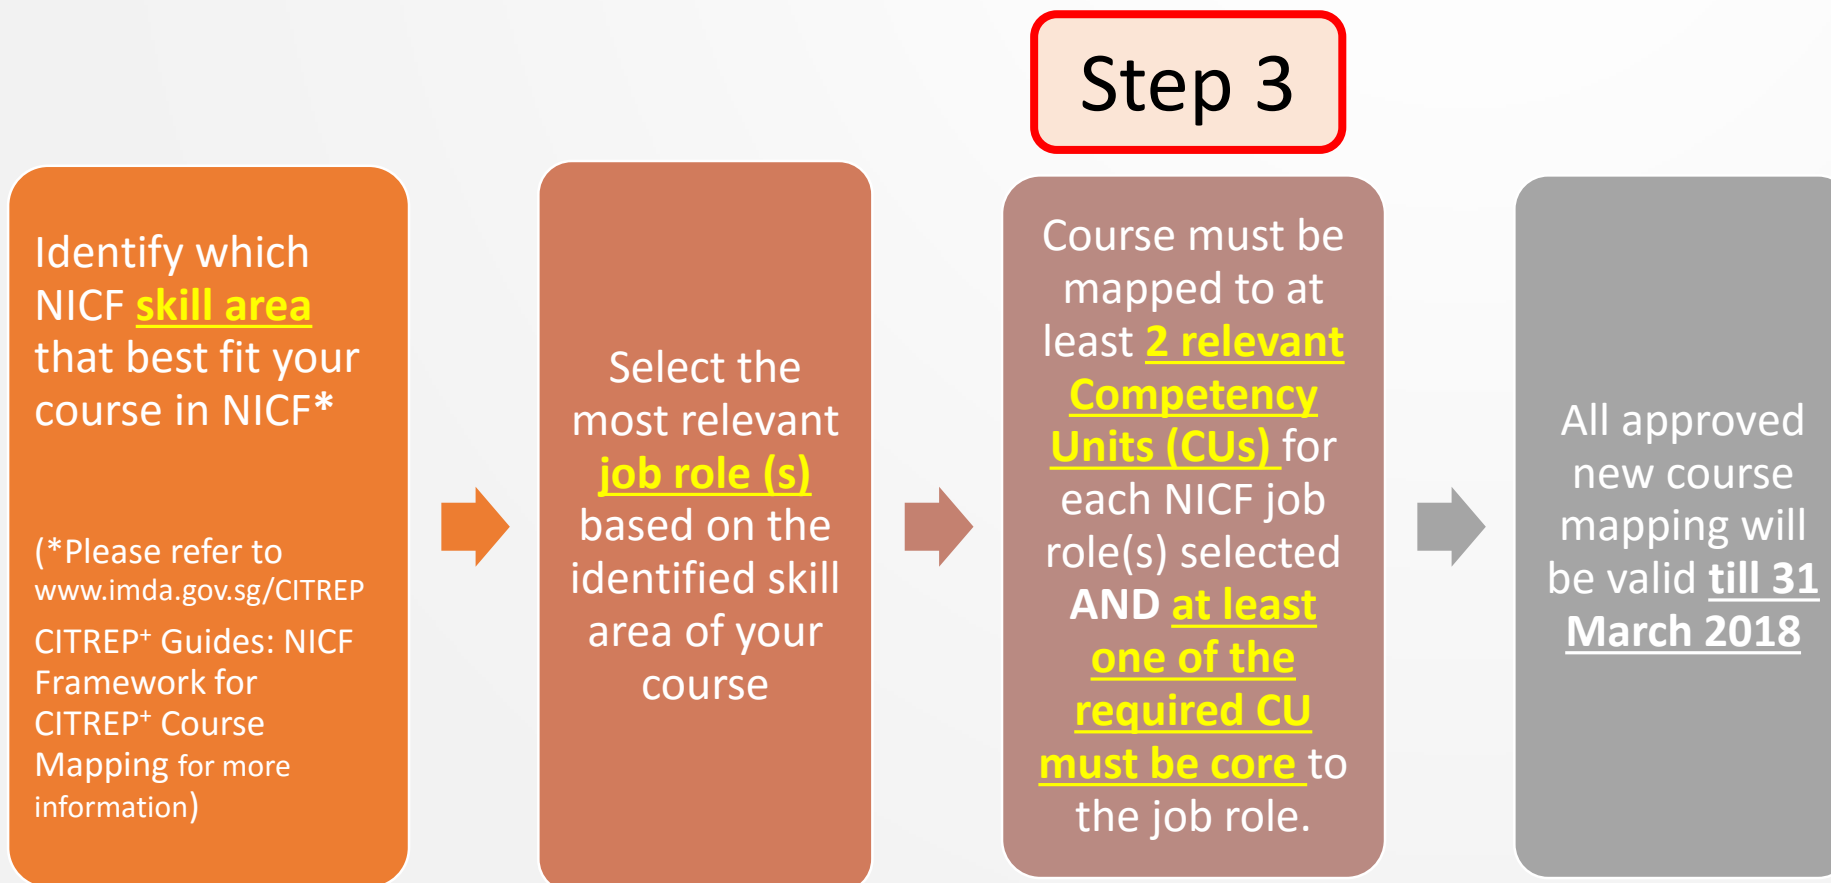

To Note: Courses and certifications from Entrant and above as defined in NICF Occupation Levels may seek CITREP+ Endorsement.

NICF Course Mapping

- New Application

Alternatively, you may refer to the ICMS navigation guide below to complete your NEW submission:

- Login as **CP AO**
- Go to **Course/Certification Endorsement**
- Click the square button **New Application**
- Select Programme For Submission: **NICF Course Mapping**
- Proceed with the necessary info and mapping matrix
- **Submit for Approval** the application for CP AA's approval

Note : The system will generate a new Ref ID number
(e.g. NICF/0913/CE/YYYYMM/00XXXX)

- Login as **CP AA**
- Click on **Items Pending for Your Action**
- Review the application details submitted by CP AO
- Click on **Approve** button to submit for IDA's processing

Note : The system will generate the same Ref ID number
(e.g. NICF/0913/CE/YYYYMM/00XXXX)

COURSE/CERTIFICATION INFORMATION

Type : **Certifiable Programme**

Certification Owner : [REDACTED]

Authorized Partners : [REDACTED]

Certification Title : **EMC Cloud Infrastructure and Services Associate (EMCCIS)**

Skill Area : **E2: Cloud Computing**

Course Title : **EMC Cloud Infrastructure and Services Associate (EMCCIS)**

Objectives : **The Cloud Infrastructure and Services (CIS) course educates participants about cloud deployment and service models, cloud infrastructure, and the key considerations in migrating to cloud computing. The course covers technologies required to build classic (traditional), virtualized, and cloud data center environments. These technologies include compute, storage, networking, desktop and application virtualization. Students will learn about the key considerations and steps involved in transitioning from the current state of their data center to a cloud computing environment. Upon completing this course, participants will have the knowledge to make informed decisions about migrating to cloud infrastructure and choosing the best deployment model for their organization.**

Target Audience : [REDACTED]

Minimum Entry Requirements : [REDACTED]

COURSE OUTCOMES

No. Of Course Outcomes 5

S/N	DESCRIPTION
1.	Understanding transition from Classic Data Center environment to the Virtualized Data Center environment and to the Cloud, with understanding of each layer: compute, storage, network, desktop and application.
2.	Describe business continuity in a Virtualized Data Center environment.
3.	Understand cloud computing basics, infrastructure components, service management activities, security concerns and considerations for Cloud adoption.
4.	Incorporate and list the critical aspects of cloud services as elements of cloud infrastructure planning
5.	Identify key governance, audit and compliance considerations.

Sample of Detailed Competency Units

NATIONAL COMPETENCY STANDARD

Framework : National Infocomm Competency Framework
 Competency Category : Big Data Analytics
 Competency Code : IT-BDA-302S-1
 Competency Unit : Prepare data for big data analytics
 Competency Descriptor : The unit defines the competency to ingest and prepare the data for big data analytics. It involves reviewing the data requirements, ingesting and cleansing the data required for the analytics projects.

Complexity Level : 3 (Entrant level)
 Credit Value : 3
 Version Number : 1
 Effective Date : 2013
 Review Date : NA
 Developer : WDA & IDA
 Custodian : WDA & IDA
