Cloud Computing & IT Solutions Service Providers

1. AXIOM IT SOLUTIONS Pte Ltd

AXIOM IT SOLUTIONS Pte Ltd focuses on bringing about the Cloud Computing and Mobility to our customers in Singapore and around the region. We work closely with leading cloud Service Providers like Microsoft, Starhub and IBM, in offering public cloud solutions as well as design & build private cloud infrastructure for Large Enterprises, SMEs and IHL. Our R&D team specializes in developing cloud based mobility solutions for Telcos as well as customized mobile applications for Enterprises, on IOS, Android and Windows 8 devices.

In December 2012, we were awarded the Technology Enterprise Commercialization Scheme (Proof of Value) jointly administered by Spring Singapore and IDA Singapore, for our Cloud Based Fixed Mobile Convergence Project.

In 2013, we were awarded by Microsoft for the 2013 Partner of the Year for Asia Pacific-Cloud, Houston (Microsoft Worldwide Partner Conference 2013). We were selected from over 28,000 Microsoft Partners from 12 countries in the region. Also we were awarded 2013 and 2014 Partner of the Year (Cloud-Office 365) for Singapore for two consecutive years.

i. Service Offerings

- **Microsoft Office 365** – A cloud based productivity suite that enables users to work from anywhere, anytime, and supported on common devices. It includes emails, collaboration sites (Sharepoint), cloud storage (Sky Drive), online communication tools (Skype for business) and common Microsoft tools (Word, Powerpoint, Excel).
- **Enterprise Mobility Suite (EMS)** – A device management tool that enables a centralised management of a disperse workforce. All users can work from anywhere, and the company can perform a centralised support and management of the devices for all their staffs.
- **AXIOM SMS Appointment Notification & Reminder System** – An automated system for businesses that need to send frequent notifications to their customers for appointments and payments. This helps to improve SME productivity and cost savings as the automated system unloads the tedious works from staffs. The system allows sending of unlimited SMS at no charge, based on a subscription model.
- **Advisory services on New Ways of Work** – Free professional consultation on New Ways of Work with cloud and mobility. If feasible, we will provide follow-through design, implementation, and training and support services to our clients.

2. Justlogin Pte Ltd

Justlogin is a spin-off from ST Electronics Ltd with a paid-up capital of \$2.75M. We are the pioneers in cloud-computing software for HR and collaborative applications. Over the last 15 years, we have built a suite of robust HR and collaborative applications. Our customers include AT&T Asia Pacific, Boston Consulting Group, IKEA, Air France, as well as Government agencies such as Civil Service College, Prime Minister's Office, etc.

i. Service Offerings

- **eTimeclock** - A time attendance system that allows employees to work remotely by allowing them to clock in and out from their mobile devices. With eTimeclock companies can also implement flexi work hours for their employees
- **ePayroll** – A payroll system that helps companies to automate their payroll processing by enabling bank transfer, paying CPF and filing tax forms online
- **eLeave** – A leave management system that allows companies to automate the process of applying for leave, approving leave and keeping a record of all leave taken. With eLeave employees can very simply apply for leave from their mobile phone, and will receive the approval as a notification
- **eForm** – A claims management system that automates the claims filing process. Eliminating these tedious and manual processes means that it will be easier for companies to implement remote and flexible working arrangements for their employees

Retail Service Providers (RSP)

7. LGA Telecom Pte Ltd

LGA Telecom Pte Ltd is an established Infocomm Service Provider since 1995 and an industry pioneer that has helped shape Singapore's Internet ecosystem. In the past two decades, LGA has been delivering resilient enterprise solutions that ensure uninterrupted business operations. Today LGA offers comprehensive managed security services and solutions that identify, alert and mitigate technological vulnerabilities, threats and potential breaches to the network and systems. Enterprises and government agencies rely and trust LGA for their security needs beyond connectivity.

i. Service Offerings

- **High Availability** – NetDefense® stops at nothing to ensure operational serviceability at all times. Your Internet connection has dual links (dual sources) to attain near-zero downtime for Mission Critical Class-level service connectivity
- **Unified Threat Management** – Our Unified Threat Management (UTM) and Intrusion Prevention Systems (IPS) inspect all inbound and outbound traffic on any given network and allow only safe traffic to pass while blocking unsafe content. With Virtual Private Network (VPN), all employees can access their company's network outside the office while enjoying the same level of security
- **Simplified Control Management** - Performance management has become a crucial part of the IT team's role. NetDefense® enables IT managers to make informed decisions in highly complex business environments that leverage heavily on technology. By making network activities plain, simple and visible to clients, it empowers them with complete control and manageability
- **Event and Log Management** – Event & Management Service is capable of dealing with large volumes of device events and log messages that can be analysed and presented in your network and system activities report. Our solution is also capable of configuring, monitoring, remedying, and auditing the sheer number and types of devices on your network, thereby reduce operational costs and streamline your Compliance Lifecycle
- **Threat Response & Comprehensive Support** – NetDefense® Threat Response is an optimised process that quickly identifies, verifies and stops malicious data that attempt to breach our customers' network. NetDefense Support is available 24/7 and comes with a guaranteed response time to an incident. Our customers are served by highly skilled network and system engineers and hardware is warranted at all times and will be promptly replaced at no cost in the event of failure
