

# Avvoka

Contract better and faster with our **no-code**, intuitive document automation tool

## Automate

Transform standardised documents into automated templates, without coding.

## Draft

Create perfect, error-free documents every time.

## Analyse

Leverage contract data to spot bottlenecks and pushbacks to refine future negotiations.

## Collaborate

Draft, comment in real time and streamline internal approvals using automatic workflows.

## E-sign

Sign or witness immediately with Avvoka Sign, DocuSign or Adobe Sign.

## Negotiate

Quit emails and negotiate on our platform for a single, auditable source of truth.

## HOW WE ARE USED

### Mass generation

Create 1000's of documents at once from Excel, or via our API

### Empower all users to self serve

Deploy automated contracts to allow any business user to safely self-serve

### API-driven generation

Use our powerful API to interact with other core systems (like Salesforce, PowerApps or SAP)

### Deal automation

Rapidly turnaround automated transaction documents, to use on live deals

### Client portals

Create branded portals for clients to access your pre-automated documents

### Public forms

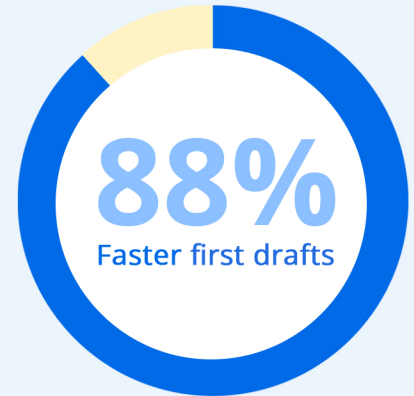

Host Avvoka questionnaires online for clients or colleagues to answer

### Negotiate and E-sign

Facilitate collaboration and adversarial negotiation on third party paper

### Cross-populate document bundles

Leverage shared data points between documents to avoid re-keying data

## OTHER GREAT FEATURES

Clause & Variable Library

Approvals & Workflow Engine

Mass Generation

Negotiation Heatmaps

Connected Documents

API Driven Documents
