

Committee of Supply 2022

INVESTING IN OUR DIGITAL FUTURE FOR OUR BUSINESSES AND PEOPLE

As digitalisation becomes an increasingly important part of our lives, we are strengthening our resources in 2022 to equip both businesses and individuals with opportunities that advance us toward a shared digital future.

Empowering Digitalisation Journeys

SMEs get further support in going digital with refreshed Industry Digital Plans, more solutions under the Advanced Digital Solutions scheme and a broader suite of e-commerce platforms under Grow Digital.

Safeguarding Businesses and Consumers

Establish cybersecurity and data protection for SMEs to help them protect the data they collect and recover quickly from data breaches.

Strengthening Consumer Protection

The Alternate Dispute Resolution Scheme (ADR) will be an effective alternative channel for consumers facing contractual disputes with service providers.

Enabling New Pathways

More tech job opportunities for Polytechnic and ITE graduates, and new Fintech Degree programme.
