

DATA SHARING

FOR ORGANISATIONS

Businesses have recognised that pooling data together, or getting access to external sources of data, can generate greater value. This can be achieved through trusted data sharing partnerships.

The IMDA's Trusted Data Sharing Framework can help you kick-start your organisation's data sharing journey through guidance on 4 key areas.

DATA SHARING STRATEGY

Provides information on requisites for data sharing, including the assessment of data sharing potential and value.

OPERATIONALISING DATA SHARING

Highlights how beyond data transfer, proper handling, use and disposal of shared data help to build trust.

LEGAL AND REGULATORY CONSIDERATIONS

Guides organisations through key areas for legal compliance when sharing data, and when structuring a data sharing agreement.

TRUSTED DATA SHARING FRAMEWORK

TECHNICAL AND ORGANISATION CONSIDERATIONS

Offers technical considerations and possible mechanisms required to move and share data in a secure, responsible manner that instils trust in the data partnership.
