

Annex A

Potential use cases would focus on 2 key areas:

Areas across Model / App	Scope	Potential examples of PETs use cases
Development	Making more data available for Gen AI model and app development, e.g. when data needs to be shared for pre-training, fine-tuning or RAG	<ul style="list-style-type: none">• Gen AI model training in a TEE• Generating synthetic unstructured data for training gen AI models
Use	Addressing the potential for confidential data to be included in the input and output when interacting with Gen AI apps	<ul style="list-style-type: none">• Encrypted Inferences using SMPC• Conducting Inferences in a TEE• Gen AI PETs solutions to identify and anonymise CD in input and output
