

Case Reference	REG/INTC/006
Title	StarHub's Actions relating to SingTel's Unilateral Implementation of a Technical Solution for Routing Calls between SingTel's and StarHub's Networks
Case Opened	20 November 2003
Case Closed	1 July 2004
Complainant	IDA initiated this enforcement proceeding of its own accord.
Respondent	StarHub Pte Ltd (" StarHub ")
Case Summary	Arising from IDA's consideration of a request by StarHub for enforcement action under the Telecom Competition Code against Singapore Telecommunications Ltd (" SingTel ") for SingTel's unilateral implementation of a technical solution for routing calls between SingTel's and StarHub's networks which resulted in call failures (" Routing Solution ") (Case reference: REG/INTC/005 (closed on 1 July 2004)), IDA also made a preliminary assessment that StarHub was also in breach of section 4.3.1 of the Telecom Competition Code by its actions in connection with SingTel's implementation of the Routing Solution.
IDA's Determination	IDA assessed StarHub's submissions and, after careful consideration of the matter, IDA decided StarHub had not breached section 4.3.1 of the Code.
