4.1 The Platform Connection Service is a service that enables the Contracting QP’s Authorised Users to access the Platform and utilise the services therein.

4.2 Pursuant to the Platform Connection Service, the Contracting QP can access and connect to the Platform via either or both of the following connectivity options:

Under this option, Nucleus Connect will enable the Contracting QP’s access and connectivity to the Platform via client-based secure public Internet VPN connection. Upon successful setup of the Platform Connection Service, the Authorised Users will be able to access the Platform using secured two-factor login at the RSP Portal.

(b) B2B Connection (“**B2B Option**”)

Under this option, Nucleus Connect will provide a set of the Platform’s APIs to the Contracting QP for it to implement flow-through business transactions with the Platform. Nucleus Connect will enable the Contracting QP’s access to the Platform via a dedicated point-to-point secured link (the “**NC-QP Connectivity**”).

For the avoidance of doubt, the Contracting QP shall be responsible to procure the NC-QP Connectivity at its own costs.

Pursuant to the B2B Option, Nucleus Connect shall perform the interface testing as set out in Appendix 2. Upon successful setup of the Platform Connection Service, the Authorised Users will be able to access the Platform directly from the Contracting QP's own OSS/BSS system.

Nucleus Connect will support the Contracting QP in the testing of its system interfaces with the Platform's APIs provided; and

- 4.4 Upon the successful setup of the Platform Connection Service, the Authorised Users will be able to access the Platform and utilise its services, which shall include the following functions and/or services:
